Best Dental Team

CONFIDENT dental care
Creating healthy, confident smiles

Your *Confident* Dental experience

Have you ever had a one-on-one conversation with your dentist about what **YOU** would like from your dental care? So often all you hear is what's wrong with your teeth. But what about telling you how to get the smile you've always wanted?... *That's where we are different...*

Dr Colin Neil, BDS (Univ. of Bristol) MFDS RCS (Royal College of Surgeons England), MSc (Masters degree in Implant Dentistry, Univ. of Warwick), Diploma Dental Sedation (King's College, London)

Dr Neil is joint principal dentist at Confident Dental Care and in addition to his extensive training in aesthetic and cosmetic dentistry and surgery, has innovated many exciting new treatments offered at the practice including dental implants, the Inman aligner (rapid tooth straightening), facial aesthetics and conscious sedation for anxious patients. Dr Neil is a full member of the British Academy of Cosmetic Dentistry (BACD) and Fellow of the International Congress of Oral Implantologists and he teaches implant dentistry to other dentists in his role as a tutor and examiner for the University of Warwick MSc degree programme in Implant Dentistry and as an accredited Clinical Coach for Astra Tech Dental Implants and Mentor for the Association of Dental Implantology.

*"We would love to work with you to give you the healthy confident smile you deserve. We are confident that our practice has something different to offer in that **YOU** are in control of your treatment and you will always be the most important person in our practice. Come and see how we are different"*

CONFIDENT dental care
Creating healthy, confident smiles

Professional Care for you

Confident Dental Care, Stroud was founded by Dr Ewa Rozwadowska in 1984. Dr Neil joined the practice in 2007 and in 2010, became joint owner of the practice. Our philosophy of care is and always will be, preventive and this approach extends through all we do at the practice.

[Dr Ewa Rozwadowska, BDS \(Univ. of Birmingham\)](#)

Dr Rozwadowska has over 30 years of dental experience and is best known for her special interests creating brand new smiles for patients far and wide through her Smile Designs. Ewa is a committee member of the British Academy of Cosmetic Dentists (BACD), along with a host of other dental societies and attends numerous courses, getting the very latest training on solving the most complex dental problems. Her other passion is Children's dentistry through our award winning Future Smiles programme.

Natural confidence is something we should all enjoy. At Confident Dental Care, you will be provided with the best quality treatment, using the latest techniques and outstanding clinical skills, truly suited to your needs to ensure you wear YOUR smile with confidence. Exceptional patient care is our priority and our professional, friendly team are all trained to help you with any questions you may have.

Our special skills include quality general dentistry, cosmetic dentistry, dental implants, sedation and gentle, sympathetic care for both adults and children.

To complete your experience, we can also offer advanced facial aesthetic treatments to reverse the ageing process, all carried out with the same exacting clinical expertise.

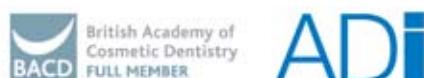

Our practice is Denplan Excel accredited and we were the first dental practice in the UK to achieve the Investors in People award, showing dedication to your care and our professional training for the ultimate patient journey at our practice.

We would love to work with you to create the healthy, confident smile you deserve.

Sounds different? We are!

Cosmetic Dentistry
FULL MEMBER

SIMPLY CONFIDENT

If you are happy with your smile and want to keep your mouth as healthy and attractive as possible, 'Simply Confident' at Confident Dental Care offers you and your family general dentistry created beautifully with top class oral hygiene care and advice. A dental care plan will be designed to suit your expectations and requirements with the individual care and attention you deserve.

Emergencies

We realise you cannot plan ahead for toothaches so we reserve emergency time each day. Please telephone the practice before 10.30 am to arrange a special appointment. For emergencies at weekends please telephone the practice, where you will receive instructions on how to contact the emergency rota provided by the Stroud Association of Dentists. (There is a fee for weekend call outs. Please see our 'in an emergency' section on the menu bar of the website).

Appointments

Appointments are arranged to suit the treatment you require and can be made either by dropping in to see us at the practice, by phone on 01453 764287, by e-mail: reception@confident-dental-care.co.uk or via our website at www.confident-dental-care.co.uk. If you are unable to keep a treatment or check-up appointment, please help us to allocate the time to another patient by giving us at least 48 hours notice. A fee will be charged for appointments missed or cancelled at short notice (less than 48 hours notice).

Comments good or bad

If you wish to comment on any aspect of your dental treatment or care, please contact our Practice Manager, either in person, by phone on 01453 764287 or by e-mail.

Our payment policy

We strive to make your treatment plan as clear and simple as possible. You will be given your own copy of your plan to take away and consider. As far as possible, we endeavor to provide you with all costs before treatment commences so that there are no surprises when it comes to making a payment. We have a range of payment options and will work with you to ensure that the treatment is affordable. See our separate "Pay the Confident Way" brochure to find the most appropriate payment terms which are always agreed before treatment commences.

Our promise to you

Your options for care

Each member of the dental team is fully trained to discuss with you any aspect of your dental care and we are happy to spend time in helping you to understand what treatments are suitable for you. You can see the options available to you and the costs involved before you make up your mind about your final treatment plan.

Quality of treatment – our guarantee to you

We use the highest quality materials in all our procedures and wish to provide treatment which will serve you well. If any dental treatment fails due to defective workmanship or materials within one year, we will replace it free of charge. This includes laboratory items, provided they have been correctly maintained and checked.

Sterilisation

We wish to ensure your complete protection from the possibility of cross-infection. All instruments used in our practice are autoclaved (high pressure steam sterilised), disposable, or chemically disinfected. Surgical gloves and masks are worn routinely. You are welcome to see our sterilisation procedures which comply fully with HTM01-05.

Our 'Simply' Confident programme aims to keep you smiling with confidence by offering:

- Long lasting general dental healthcare
- Oral health screening- check-up and hygiene visit all in one saving you time and travel costs
- Cancer screening for peace of mind
- Ozone treatment to help "zap" away unwanted cold sores

Simple, flexible payment plans are available to ensure you can enjoy routine, quality dental care within a budget that suits your individual situation.

Our 'Steps to Health' hygiene services include:

- Individual programme to keep your mouth as healthy as it can be
- Regular advice and care
- Fresh breath clinic to help improve your self-confidence
- Florida probe® computerised picture of your gum health for correct treatment and focussed advice .

CONFIDENT implants

Are you missing a tooth or many teeth but confused about the options available to you? Maybe you have problems eating or are embarrassed to smile because of the gaps or loose dentures? People lose teeth for a variety of reasons, be it through accidents, gum disease or old failing crown or bridge work. Replacing missing teeth is so important, not only to look better in the mouth but to support your lips and cheeks and avoid bone shrinkage that you would otherwise experience if the space is left.

Dental implants form the solid foundations to support your replacement teeth which can then be made to look, feel and work just like natural teeth and are firmly fixed to restore your confidence. Our state of the art in-house cone-beam CT scanner give us safe, efficient 3-dimensional planning of implant treatments and we take referrals from other dentists.

"I was very impressed with the attention to detail from the whole team. The sedation had the effect of shortening the extensive dental implant treatment and I would certainly recommend this". Male patient 58.

Our annual Future Smiles week takes a different focus each year, concentrating on the best ways to look after your Children's teeth and prevent tooth decay and gum disease – with a fun themed twist!

Screening: Diagnodent™ laser light check for the earliest signs of holes in teeth

Education: Progressive programme of education, prevention and practical training in all aspects of dental health and disease at each screening session, which means graduates at 18 with fabulous smiles to take on into their future.

Prevention: Individual programmes for high risk patients.

Age specific care: Programme of diagnosis, prevention and treatment geared to each age group (gentle Children's care from birth to teenage).

Treatment:

- Catch the earliest signs of decay or gum disease
- Micro dentistry - minimal intervention using air abrasion (sandblasting with no drilling); sealants to prevent decay in deep grooves
- Beautiful tooth coloured fillings placed with extreme care and effective anaesthesia, if ever needed!

"No fillings for life" is our goal with our Future Smiles programme

Future Smiles at Confident Dental Care

Dentistry for the next generation

With 30 years experience of Children's dentistry, we are passionate about preventing disease and educating your child to provide them with the healthiest teeth and most confident smile. If treatment is needed, we will treat your child like our own.

What we do that's different:

Gone are the days of drilling and filling. Your child need never have to experience injections, drills or unsightly fillings. Future Smiles uses the latest pain free technology mixed with fresh thinking! Our aim is to make your child feel comfortable and happy at the dentist and show them how to take care of their teeth during their various growth stages.

CONFIDENT smiles

Do you want a brighter, cleaner, more attractive smile? Are old, ill-fitting crowns causing you embarrassment? Perhaps you just want to improve the appearance of a crooked tooth? If you would like to improve anything about your smile for a special occasion...or just because you're worth it... come and see us for a personal, confidential consultation.

You may be looking for tooth coloured fillings to replace ugly black ones, tooth whitening at home whitening/whitening in 1 hour or deep bleaching treatment - all available. If you need something more complex including comprehensive "smile makeovers" with veneers, crowns, bridges, tooth straightening or dental implants, our award winning team can create the most beautiful, handcrafted restorations for you. Often you'll not be able to tell them apart from natural teeth! Both Dr Rozwadowska and Dr Neil are full members of the British Academy for Cosmetic Dentistry (BACD).

Before

After

"I am really pleased with my teeth – I can't believe how quickly they've moved & how straight they are. Everyone has noticed the difference - thank you". Female 27, (Inman aligner tooth straightening patient).

CONFIDENT FACIAL AESTHETICS

We all know that you are as old as you feel so many of our patients are now choosing to give nature a helping hand by using non-surgical facial aesthetic treatments (wrinkle relaxing injections and/or dermal fillers such as Restylane® or Juvederm®) to ensure that the face they see in the mirror reflects how young they feel. One of the most effective ways to look younger and enhance your appearance is to smooth and soften away the tell tale signs of ageing: the dreaded wrinkles!

Facial aesthetic procedures discretely complement the cosmetic dentistry services such as tooth whitening and straightening that we offer here at Confident Dental Care. They are straightforward, affordable & can even be done in your lunch break!

You deserve to look and feel the best you can be and we look forward to helping you to refresh and reinvigorate your look with options for the following:

- Forehead frown/worry lines
- Tired eyes and ageing “crow’s feet”
- Thin lips and “gummy smiles”
- Nose to mouth lines and creases

CALMLY CONFIDENT

- Does the word “Dentist” send shivers down your spine?
- Are you scared of dental treatment and find it difficult to cope?
- Do you have problems with gagging or tolerating longer treatment procedures?
- Are you putting off having urgent treatment or implants/cosmetic dentistry?

If you answer ‘yes’ to any of these questions, you are probably one of many people in the world who has put up with unnecessary dental problems and pain in the past, so conscious sedation dentistry could be your answer to secure your dental health comfortably.

Conscious sedation is a very safe procedure and Dr Neil has completed extensive additional training in sedation techniques. You will be awake and responsive but as a result of the sedation, you will feel calm for the duration of the treatment.

Conscious sedation will ensure you are comfortable and feel the anxiety melt away. For more information about conscious sedation (without even having to see a dentist!), please pop in for a free chat to find out how we can help or call us on 01453 764287.

“It was amazing! There were no side effects and I would highly recommend it to anyone who is having lots of treatment or is anxious about dentistry” female patient, 63.
